ShivWorks Extreme Close Quarter Concepts (ECQC): Law Enforcement Module

ShivWorks is offering a law enforcement only rendition of the proven ShivWorks Extreme Close Quarter Concepts (ECQC) curriculum with an additional dedicated edged weapons module. The course is a three day (30 hour) block of instruction which focuses on a multi-disciplinary approach to building functional, combative handgun skills at zero to five feet. The course is de-signed to instill core concepts of seamless integration and provide the platform for aggressive problem solving during a life or death struggle. A heavy emphasis is placed upon congruency of body mechanics between skill sets. Once the student's skill sets are initially ingrained, the participant will be stress inoculated with force on force drills utilizing marking cartridges and protective equipment. The contextual elements of the coursework are driven and centered around lone law enforcement officer who may find themselves entangled, standing or grounded with one or more opponents in a weapons based environment.
